

If you were a driver for a corporate rental (including film and television), we are aware that you may have received an invoice from our third-party toll administrator, HTA. We want to explain to you why this is happening.

All Edge vehicles are equipped with an E-ZPass. When your rental goes through a toll, the charges are made to the production company's credit card separately than the vehicle rental. However, a recent software update from HTA impacted the billing process. Instead of the company being charged the toll amount, the driver of the vehicle has been receiving the toll invoice to the address listed on his or her driver's license.

In this scenario, the driver is not individually responsible for this invoice. If you or one of your drivers received an invoice from HTA, please send the invoice to tolls@edgeautorental.com and we will handle this matter.

We apologize for any confusion this may have caused.

When a vehicle goes through a toll, HTA charges a daily toll fee. The daily toll fee is \$4.95 per rental per day up to a maximum of \$24.75 per rental month. For example, if you have a three-day rental and you go through one toll on day one and no more tolls for the rest of the rental, you will be charged \$14.85 ($\4.95×3). You will be charged the same amount if you go through any number of tolls during your rental. Similarly, if you have a six-day rental and go through at least one toll at any point during your rental, you will be charged \$24.75 ($\$4.95 \times$ maximum five days).

Normally, the company would be billed every month for their toll charges, but unfortunately the process has been taking longer than expected. We understand this causes problems to our customers who are renting vehicles for a specific project and need to reconcile bills in a timely manner. We are working on alternative solutions at this time and will provide updates on this matter as we receive them. Should you have any questions with regards to your tolls, please contact Tim Brennan at (212) 947-3343 x122.
